

# Let's Keep Our Neighborhood Safe!

## Safety Tips

Drive with care.  
Drive like your kids play on this street.

Slow down. Speeding is a choice.

Pay attention. Watch for potential hazards and expect the unexpected.

Be prepared. Always wear a seatbelt or helmet.

Share the road. Be aware of people walking, biking, running, driving, or using a wheelchair.

## Avoid autopilot driving & distractions

- Look both ways when making a turn to spot those who may not be immediately visible.
- Prioritize saving lives over saving time. The faster a vehicle is moving, the more damage is done during a crash.

## Stay alert

- Over 52% of reported crashes occur within 5 miles from home.
- 77% of crashes occur within a 15-mile distance.

## Let's raise the next generation with a safety mindset

- Teach children not to run or dart out into the streets, or cross in between parked cars.
